

Login page

- big logo
- username and password inputs
- additional buttons for "login", "forgot password", and "register"

### Expanded hamburger menu

- allows user to navigate to other pages
- at bottom is disclaimer, legal stuff, or logout (given they logged in)
- maybe limit this to when user is actually logged in

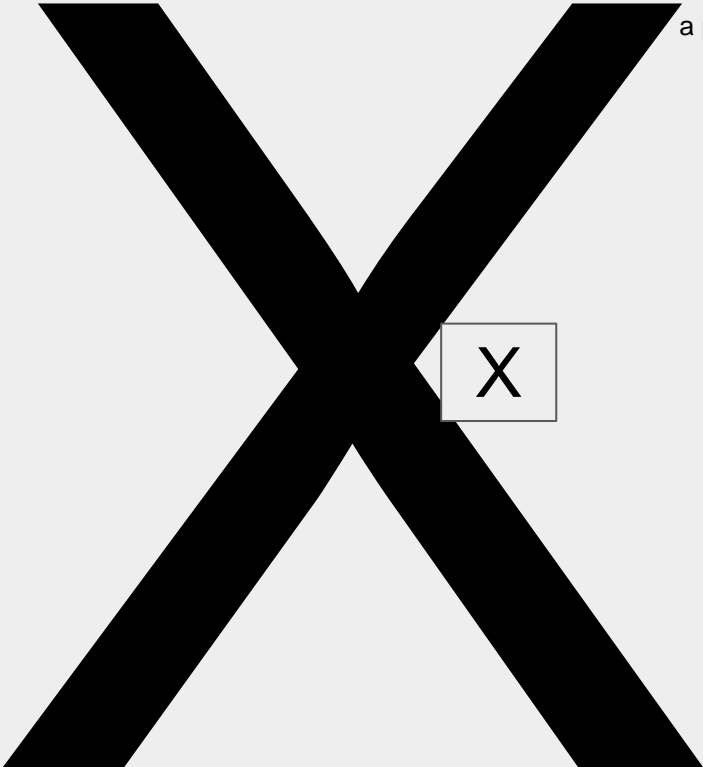

~~~~~

v

Bulletin where pins (posts) are located

- uses user's location and a map api to create map with user created pins on it
- search bar at top to search through posts or select a post category through dropdown

~~~~~

V

Demonstration of search menu

V

Demonstration of clicking on a post  
and expanding it, seeing details about  
it

~~~~~

No one to message (no friends)

- prompt telling you to find someone to message and a textbox to input some form of identification/username to send a message request
- probably add some way to add friends and search for them through this menu to message (like discord)
